

Case Study 5 - Green

Location: Birmingham, West Midlands
Kitchen Style: Solid Walnut
Appliances: Various
Worktops: Kashmir White Granite

Mr & Mrs Green were renovating their West Midlands home, and first contacted us after finding the website. Location was not an issue, and we utilised the internet to allow easy presentation of the designs.

The client had very clear ideas on the type and finish of kitchen they were looking for - solid walnut. Once of the most stunning solid doors available. Mr Green emailed us his room dimensions and a brief detailing what was required in the design. This was followed up with a phone call to run through design ideas.

One suggestion we made to the client was to contrast the dark, solid walnut units with a light, silver/white granite Worktop - something the client really took to, and as you can see, chose for the final design. This, along with the stainless steel elements, created the modern, co-ordinated look the client was looking for.

Once we had agreed the design, we visited Mr & Mrs Green at home, with samples of the chosen materials, to ensure these were as expected. A second visit was made once the kitchen had been completed.
